Jon Habben

Special Agent (SA) Jon Habben has 18 years of law enforcement experience as an FBI SA assigned to the Los Angeles Field Office. Since 2004, SA Habben has been assigned to the Orange County Resident Agency, investigating various white-collar violations such as cyber matters and health care fraud. SA Habben has traveled overseas to look into international corruption in Afghanistan and served as an Operator on the FBI Los Angeles SWAT team for 10 years. In 2019, SA Habben began working with the FBI's Investigative Genealogy (IG) Team in Los Angeles. His efforts have helped to resolve dozens of cold case violent crimes nationwide. SA Habben continues to work with federal, state, and local agencies using genealogy to resolve cases of some of the nation's most violent crimes.

Mark James

Special Agent (SA) Mark James has 18 years of law enforcement experience as an FBI SA assigned to the Baltimore Field Office investigating gangs, narcotics, and violent crimes. Since March 2020, SA James has been the East Region Team Leader of the FBI Investigative Genealogy (IG) Team, which is responsible for conducting IG on violent crime and unidentified human remains cases on the East Coast of the United States. The East Region FBI IG Team has been responsible for the successful resolution of numerous violent crimes—including rapes and murders—and the identification of unknown homicide victims.

Stephanie Mellinger

Staff Operations Specialist (SOS) Stephanie Mellinger works with the FBI in its Baltimore Field Office. SOS Mellinger began her career with the FBI in 2006 as a biologist at the FBI laboratory in Quantico, Virginia, working in both the Mitochondrial and Nuclear DNA Units. In 2016, SOS Mellinger transferred to the FBI Baltimore Field Office, where she has worked on the Violent Crimes Task Force. Since March 2020, she has been a certified member of the FBI Baltimore Investigative Genealogy (IG) Team, which has resolved numerous violent crime and unidentified human remains cases.

Sean Regan

Special Agent (SA) Sean Regan has over 25 years of law enforcement experience. He has been with the FBI as an SA for over 15 years and is currently assigned to the Baltimore Field Office. He is also the Primary Behavioral Analysis Unit Coordinator for FBI Baltimore and a certified FBI Interview and Interrogation Instructor. Prior to joining the FBI, he spent 12 years as a trooper with the Pennsylvania State Police. Since March 2020, SA Regan has been a certified member of the FBI Baltimore Investigative Genealogy Team, which has resolved numerous violent crime and unidentified human remains cases.

Amy Whitman

Special Agent (SA) Amy Whitman is an FBI Special Agent assigned to the Violent Crime/Major Offenders Squad in the Los Angeles Field Office. She has 12 years of experience handling various criminal threats, including health care fraud, crimes against children, bank robberies, and threats to life. SA Whitman supports tactical operations as an Emergency Medical Technician on the Operational/Tactical Medicine Team. In 2019, she joined the Investigative Genealogy Team (IG) in Los Angeles and has assisted in resolving complex cases throughout the United States. Further, SA Whitman has helped develop a more robust IG program throughout the FBI and taught best practices to other investigators at the federal, state, and local levels.

Angela Williamson

Dr. Angela Williamson is Supervisor of the Forensics Unit and the FBI Violent Criminal Apprehension Program (ViCAP) Liaison at the U.S. Department of Justice (DOJ), Bureau of Justice Assistance (BJA). Dr. Williamson also serves as the Forensic Subject Matter Expert for BJA and FBI ViCAP/Behavioral Analysis Unit, and assists law enforcement agencies across the United States. She developed and oversees SAKI, along with other forensic-based programs at BJA. She received her doctorate in Molecular Biology and Biochemistry from the University of Queensland in Australia. She has over 18 years of experience as a forensic specialist working on complex criminal cases and missing and unidentified persons' investigations. As a forensic scientist, Dr. Williamson worked in state and private forensic labs and performed serological screening and DNA analysis on thousands of major crime cases. Prior to joining DOJ, she held the positions of Director of Forensic Casework at Bode Technology and Biometrics, and Unknown Victim Identification Project Manager at the National Center for Missing & Exploited Children. At Bode Technology, America's largest private forensic DNA laboratory, she worked thousands of sexual assault cases; homicides; and human remains cases (e.g., missing, unidentified, mass disasters), as well as many high-profile cases (including the Zodiac serial killer and JonBenét Ramsey homicide). At the National Center for Missing & Exploited Children, she oversaw forensic and biometric services, assisted in the identification of child homicide victims, and helped resolve cold case homicides. She has extensive knowledge of current forensic practices and emerging technologies and routinely trains law enforcement in all aspects of forensics, including advanced DNA techniques for crime scene evidence. In 2018 and 2020, Dr. Williamson received the DOJ Attorney General's Distinguished Service Award for outstanding contributions to the mission and goals of the Office of Justice Programs. In 2019, she also received the International Homicide Investigators Association Award for Excellence for her role in the Samuel Little serial killer investigation.
